

Your In-home display guide

Smart Meter Benefits

- **No more manual meter readings** - your meter sends readings automatically.
- **Accurate bills, not estimates** - pay only for what you use.
- **Track your energy usage** - get insights via your In-Home Display (IHD).
- **Easier to spot ways to save** - monitor usage patterns and reduce waste.
- **Supports the UK's energy upgrade** - helping build a smarter, greener grid.
- **Essential for time-of-use tariffs** - unlock potential savings in future.

Getting Started

To turn on your In-Home Display, press and hold the on/off button on the back.

Your **In-Home Display** has an easy to use touch screen. The home screen has a **HOME button** and a **MENU button**. Press the **HOME button** to return to this screen. Press the **MENU button** to access the features of your **In-Home Display**, and use the left and right arrows ← → to scroll through the menu options.

Tap the **SO FAR TODAY button** and scroll through the time periods to see your usage now, this week, this month, or this year.

Your **Energy Usage Dial** shows your electricity or gas usage as low, medium, or high.

Setting a Budget

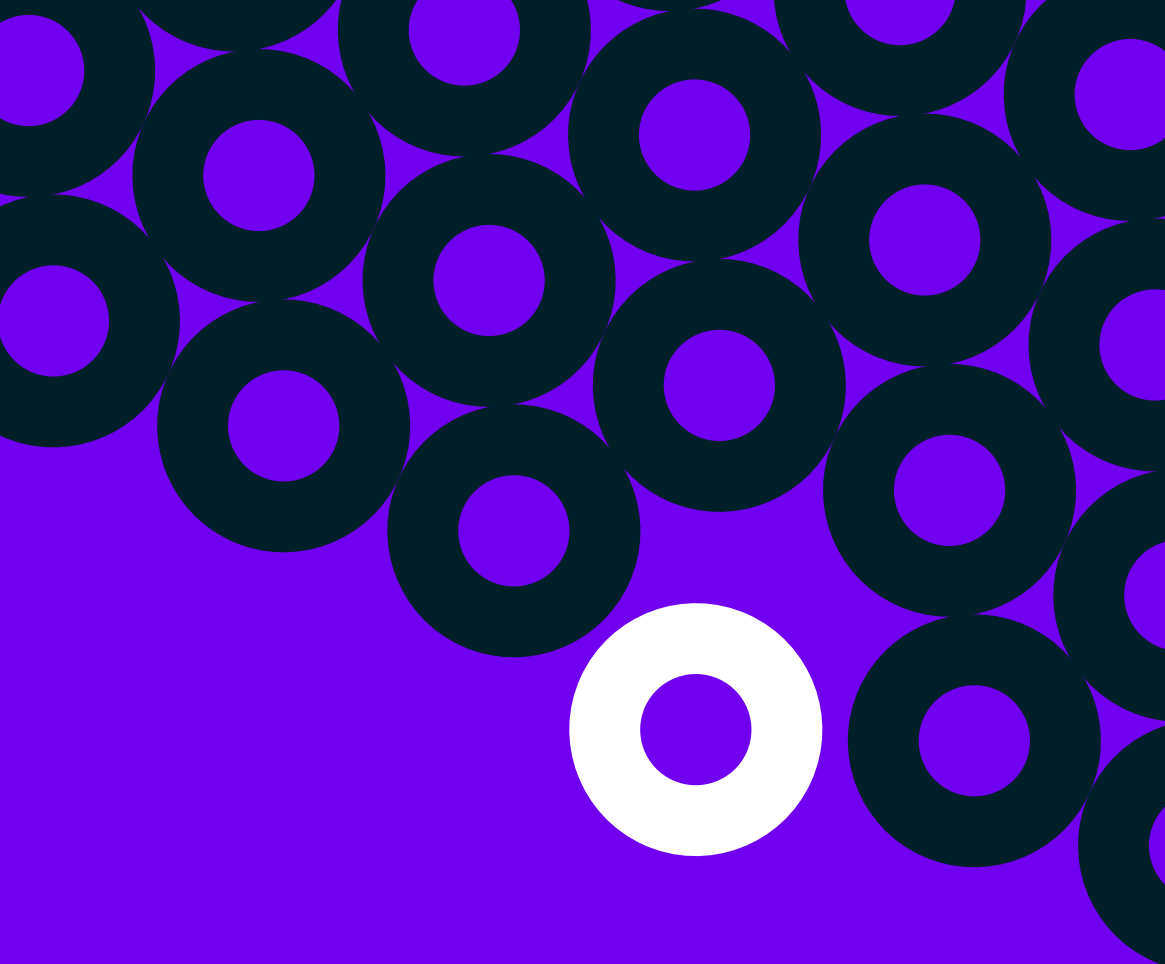

Your display is set to a default budget. However, it is best for you to set your own budget to help you monitor and manage your energy consumption better.

To set your budget, press MENU, then press BUDGET. Choose the fuel type you would like to set the budget for and **press CHANGE.** Tap the time period button to select either day, week, month, or year.

Use the PLUS and MINUS buttons to increase or decrease your budget, press SET and then OK

Your In-Home Display is for guidance only and will not reflect your monthly bill.
